Facial Recognition

ACCESS CONTROL

Introducing Bio Entries, a state-of-the-art facial-recognition access-control system that enhances security through advanced facial-recognition technology. It accurately identifies individuals through their unique facial features, ensuring that only authorised people can access restricted areas. Bio Entries offers a fast, contactless and reliable solution for modern security needs.

ON

Online Induction

Seamlessly onboard users by sending them a secure link to complete their profile online, ensuring a swift and efficient enrolment process.

FR

Fire Roll Call

Instantly generate an accurate list of all individuals on-site during an emergency, enhancing safety and ensuring quick headcounts during fire drills or actual incidents.

CS

CSCS Integration

Effortlessly sync with the CSCS database to verify and manage credentials, ensuring that only certified personnel gain access to the site.

TL

Project Time Lapse

Automatically capture and compile regular snapshots of project progress, providing a visual record of developments and changes over time for enhanced monitoring and reporting.

AN

ANPR Integration

Seamlessly integrate with ANPR systems to automatically identify and grant access to vehicles based on their licence plates, enhancing security and convenience.

Shift Management

- Shift roster
- Leave management
- Generate payroll

Delivery Management

- Manage deliveries
- Improve coordination and oversight of incoming shipments

Incident Management

- Record and track security incidents
- Prompt response and resolution
- Generate detailed reports

BIO ENTRIES

FACIAL RECOGNITION ACCESS CONTROL

SECURE. CONTACTLESS. INTELLIGENT.

ONE PLATFORM FOR PEOPLE, CREDENTIALS AND COMPLIANCE

Bio Entries supports clearer site control, faster onboarding and reliable compliance reporting - all from one intelligent access-control platform.

CO2

CO2 Emissions

Track and report carbon dioxide emissions to support sustainability initiatives by monitoring and managing your facility's carbon footprint.

FA

First Aiders

Easily identify and locate trained first-aid personnel on-site, ensuring quick access to emergency assistance and improving overall safety and response times.

EL

Event Logs

Maintain detailed records of attendance and access events, providing comprehensive tracking and reporting for enhanced security and operational oversight.

ED

Expired Documents

Automatically flag and alert users about expired documents, ensuring that all certifications and credentials are current and compliant with regulatory requirements.

PE

Pre-enrolment

Allow users to submit necessary information and documents in advance, speeding up the onboarding process and ensuring smoother enrolment.

Key Management

- Track and control access to keys
- Monitor key issuance and returns for enhanced security

Visitor Management

- Streamline visitor registration and check-in processes
- Enhance security by maintaining detailed visitor records

Reports

- Time and Attendance Reports
- Construction Reports
- On-Site User Reports
- User Reports
