COMBINED SUPPORT SERVICES

CONCRETE SECURITY SOLUTIONS

STRONG. RELIABLE. EFFECTIVE.

PHYSICAL SECURITY THAT WORKS

Concrete barriers provide a fast and effective way to secure vacant land, industrial buildings and vulnerable premises.

They can block unauthorised vehicle access, strengthen site perimeters, deter trespass and fly-tipping, and help protect equipment and assets.

Combined Support Services can provide concrete barrier solutions for temporary or longer-term site protection, with options selected to suit the location and security requirement.

- **Rapid deployment**
- **Physical deterrent**
- **Perimeter protection**
- **Vacant-site security**
- **Hire or purchase options**

OUR CONCRETE SECURITY RANGE

Heavy-duty barrier options for different site security requirements.

BARRIER BLOCKS

Approx. 2 tonnes | 3m x 0.5m x 0.7m

AVAILABILITY: Hire

For entrances, loading bays and perimeters. Reinforced concrete and steel barriers, rapidly deployed with no ground installation required.

INTERLOCKING BARRIERS

Approx. 2.25 tonnes | 3m x 0.45m x 0.8m

AVAILABILITY: Hire or purchase

Integrated interlocking system for forming a continuous barrier, with multiple lifting options. Suitable for secure perimeters.

STACKABLE BLOCKS

Approx. 2 tonnes | 1.6m x 0.8m x 0.8m

AVAILABILITY: Hire or purchase

Stackable concrete blocks for barriers, retaining walls and higher physical protection where required.

5 TONNE BLOCKS

Heavy-duty security block

AVAILABILITY: Subject to requirements

Maximum physical security for vulnerable locations and high-risk access points.

GATE SYSTEMS

Adjustable steel gate with concrete barriers

AVAILABILITY: Subject to requirements

Controlled site access while maintaining a strong physical barrier at entrances.

TYPICAL APPLICATIONS

Vacant land | Commercial & industrial sites | Entrances | Perimeters | Asset protection
