Additional Cameras	per week
Alarm Response Includes 1st hour on site	
Smoke Detector	per week
Additional Audio Challenge Unit	per week

SIMPLE, COST EFFECTIVE VACANT PROPERTY SECURITY

Strengthen your security across vacant and active sites with intelligent CCTV and video verification designed to reduce false alarms and improve response. PIR and dual-tech sensors instantly detect movement, activating integrated 2-megapixel cameras that transmit video directly to Combined Support Services' 24-hour manned control room.

The compact alarm system deploys rapidly, combining battery power and solar charging to deliver reliable, remote monitoring within minutes.

- ✓ Internal and External Protection
- ✓ Asset-specific protection
- ✓ Video Verification
- ✓ Remote Monitoring
- ✓ Guard Enhancement
- ✓ Solar- and battery-powered units
- ✓ Night-vision infrared illumination

KEY FEATURES

COMBINED
SUPPORT SERVICES

- **Long Battery Life:**
  2 to 4 years of uninterrupted operation per device.
- **Dual RF Channels:**
  Dedicated video transmission ensures reliable communication.
- **Motion-Activated Alerts:**
  PIR and dual-tech sensors detect movement instantly.
- **Enhanced Night Vision:**
  Infrared illumination up to 17m ensures 24/7 security.
- **Scalable & Flexible:**
  Supports up to 64 peripheral devices per system.
- **Cloud-Based Management:**
  Easily access and control all your devices via WebeyeCMS.

24/7

REMOTE MONITORING

ALARM RESPONSE

DETECTION	VERIFICATION	RESPONSE
!	VIDEO CAPTURED	24/7
PIR / dual-tech activation	Video sent to cloud platform	Control room assessment

IF REQUIRED

A guard is dispatched for patrol and police are alerted.

In the event of an incident, our wireless cameras seamlessly integrate with an award-winning cloud alarm platform, sending alarms and video instantly to Combined Support Services' 24-hour control room, where operators assess and manage situations quickly through a secure, browser-based system.
